

## Equipage

Tobyhanna Army Depot (TYAD) is the U.S. Army Center of Industrial and Technical Excellence (CITE) for Command, Control, Communications, Computers, Intelligence, Surveillance and Reconnaissance (C4ISR), Electronics, Avionics and Missile Guidance and Control. TYAD is the U.S. Air Force Technology Repair Center for Command, Control, Communications, Computers and Intelligence and Tactical Missiles.

### CAPABILITIES

TYAD fabricates items from cloth, rubber and foam to protect military assets from environmental and physical damage, ensuring quality products for our men and women in uniform.

TYAD is capable of fabricating, installing and repairing equipage products using a multitude of materials, such as Poly Vinyl Chloride (PVC) Laminated Fabric, Vinyl Coated Fabric, Polypropylene, Thermoplastic Rubber, Foil Insulation, Nonwoven Polyester, Weldable Webbing, Acrylic Fabric and Weldable Velcro.

Specialized equipment such as Industrial Sewing Machines, Heat Welding Machine and Computerized Gerber Automated Cutting Tables all contribute to the production of products such as tarps, storage badges, protective covers, straps, tie-downs, blackout curtains, backpack assembly, maintenance stand covers, vehicle soft tops, bench covers, thermal insulated pallet covers, soundproofing foam, rubber gaskets and environmental seals.

### SYSTEMS SUPPORTED

- AN/TYQ-23 Tactical Air Operations Module
- AN/ASM-189/190 Electronic Vans
- AN/ASM-146/147 Electronic Shelters
- Forward Area Air Defense
- Unmanned Aerial Vehicle Systems
- Firefinder Radar Systems
- Phoenix Tactical Satellite Terminals
