DPW Work Order Desk

Fact Sheet

While the DPW work order desk is operating, performance of the work orders has been impacted by limited personnel. Until further notice, only Maintenance Service Orders (MSOs) that are designated as Safety, Security or Work Stoppage will be given priority for completion. Preventive Maintenance Orders will also be curtailed to only those that may contribute to catastrophic failure of a Real Property asset.

If a MSO does not meet the above criteria the customer can call 570-615-7315 to discuss the requirement and determine if there is adequate staffing to complete the work order.
